

ENVIRONMENTAL POLICY

APULUM is a company that produces and sells household and decorative porcelain items. The activity is not highly polluting (does not fall under the IPPPC) thus it does not endanger human life and health.

ENVIRONMENTAL IMPACT

Depending on the specifics of the production activity, the impact may consist of:

- greenhouse gas emissions from combustion processes;
- evacuation of dust and toxic substances;
- temporary storage and disposal of industrial waste;
- discharge of industrial wastewater.

ENVIRONMENTAL POLICY REQUIREMENTS

- responsiveness to the legislation and to the specific requirements of the clients;
- environmental impact assessment;
- post-closure monitoring of the industrial waste landfill;
- training and awareness of employees regarding environmental management / protection.

OBJECTIVE

Obtaining and maintaining the trust of customers and employees, as well as all other interested parties, that APULUM S.A. has a permanent concern for environmental protection.

COMMITMENT

The management of APULUM S.A., through the analyzes performed periodically, will ensure the continuous improvement of the environmental management, in order to diminish its impact of it.

ACTIONS FOR THE FUTURE

- Optimizing technological processes to reduce technological losses, increase energy efficiency and reducing the carbon dioxide footprint;
- Selective collection of waste and increasing the degree of recycling;
- Continuing the post-closure monitoring of the landfill and preserving its reintegration in the landscape.
